

Plasma/Serum Small RNA Extraction Kit (Magnetic Beads)

Advantages

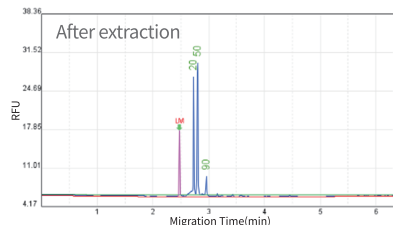

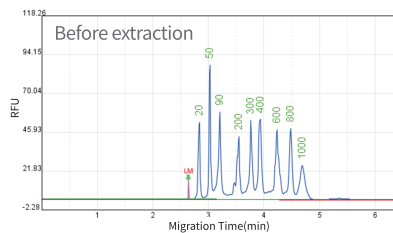

Features	Advantages
Enrich small RNA fragments	Particularly suitable for extracting small RNA <100 nt
Micro-extraction	Trace-amount (fg) small RNA from plasma/serum
High magnetic field strength	Short operation time
Non-toxic reagents	Free of phenol and chloroform
Easy to handle	Compatible for both manual and automated high-throughput extractions

Procedure

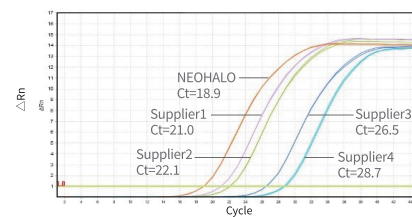

Product Characteristics

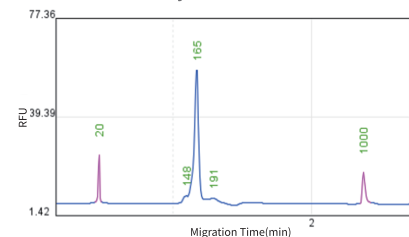

1. Particularly suitable for extracting small RNA <100 nt

2. Higher extraction efficiency

3. For NGS directly

Order Information

Product Cat. No.	Product Name	Product Specifications
KC22101	Plasma/Serum Small RNA Extraction Kit (Magnetic Beads)	32 rxns
